

Commercial and Industrial Electrical Services

At Caltrac Services, we offer wider range of services for both commercial and industrial market from complete through installation to lamp changing. We work with a goal to deliver a fast and most efficient service at affordable rates with 100 percent customer satisfaction. You will agree with us that the electrical installations and equipment need regular maintenance in order to run the business safely and on time. Pick up your phone and call us to discuss the matter as to how we can help you by avoiding costly breakdowns.

Caltrac operates a reactive service that is useful to those who have more than one place of business and require a positive response from the ones who know your premises. Since we work with commercial and industrial sectors, we carry in-house capability to work with conductors up to 630mm² with our hydraulic cable cutters and crimpers.

Our engineers hold relevant degrees to their work, as they are fully qualified and licensed. All operatives here at Caltrac Services carry PASMA certification (mobile tower scaffolds), CSCS Competency and IPAF certification (scissor lifts and self-propelled booms). They also have knowledge of Asbestos, manual handling and they are First Aid trained.

Only a few companies exist in the market which can measure customer relationships in decades. Caltrac can do and that is also for good reason. We treat your job like our own, which is why the outcome is always brilliant and satisfactory according to the standards set by the customers. We read our customers' minds and deliver the services accordingly. This is the big reason that we have big clientage that is included with our satisfied customers who have been with us for years. We have decades of experience which add values to our strong portfolio.

Our Clientage

Our clients include businesses of all nature, healthcare facilities, data and call centers, industrial facilities, manufacturers, retailers, universities and technology related companies.

Our Competencies and Capabilities

For last more than 30 years, we have built commercial and industrial electric services business on a simple idea- do apt and satisfactory work and your customers in return will keep coming back to you. This is the big reason that our big clientage includes more of our repeated customers and they are the ones who keep referring us to new customers.

Our services in commercial and industrial electrical include:

High Bay Lighting

Our high bay lightning solutions are quite energy-efficient, reliable and low operating cost effective. Discuss with us to generate a brighter and safe place. These kinds of lights are often mounted through a chain or pendant.

Fire Alarm Installations

Your commercial or industrial sectors or premises need high quality detention methods and safety ways. We understand it and deliver comprehensive fire safety solutions such as fire alarm installations

Machine and Motor Installations

Caltrac Services always provide satisfactory outcomes and quality services. We are experts in servicing, repairing and installing the machine and electronic motors.

Transformers Installations

Failures can always happen to the transformers due to various factors no matter whether they are of higher qualities. We install and repair the transformers of all voltages.

Clinic and Patient Care Installations

Caltarc Services endow our customers with experienced and quality work. We provide content to all rooms in clinics and patient care centers. Lightings are installed very aptly to hospitals and clinics.

Warehouse and Bay Installations

We also deal in warehouse and bay lighting installations. We install brand new lighting and we also deal in replacement of old and commercial warehouse lighting. Come to us to explore variety of solutions.
